

Boost Tiger

felinus boosticus

RRROOOOOOAAAARRRRR!!!

Thanks for supporting Mr. Black and harnessing the power of the Boost Tiger. Boost Tiger is VERY powerful.

Every Mr. Black pedal is designed and handmade in the rainy pacific-northwest--South-east Portland, OR to be precise.

Boost Tiger is a REALLY powerful pre-amp specifically designed for electric guitar and bass use. What you put in is what you get out, with as much volume as is sensible, or non-sensible.

Harnessing the Boost Tiger:

- Be sure your amp is in good working order.
- Find a helmet. And goggles.
- Plug your guitar into the input jack on the right side of the pedal and your amp into the output jack on the left side of the pedal.
- Turn the knob all the way down and step on the foot-switch.
- Adjust the knob to control how much Tiger Boost you need, or want.

Features:

- Easy-as-tiger-pie operation.
- Nominal 500K Ω input impedance and 2K output impedance to drive long effects chains and cable runs
- LOTS OF TIGER BOOST AVAILABLE
- Fucking awesome in effects loops as a lead / solo volume boost
- True-bypass
- 9V power (2.1mm negative center pin adapter) or internal 9V battery

To replace the 9V battery, grab your trusty philips head screwdriver and remove the four screws holding the backing plate on. The battery sits right below the foot-switch. I think you can handle the rest.

If you haven't already, join the Black List for news, specials, promos and even the occasional hot dog.

Visit:

www.mrblackpedals.com to sign up. Its free. And free is a good color on me.

Controls:

- TIGER: Controls output power
 - Full CCW: +0dB clean gain
 - Full CW: +20.7dB clean gain
- BYPASS SWITCH: Toggles on/off
 - LED on: **RRROOOAAAARR!!**
 - LED off: meow.

Tech stuff:

- Input impedance: ~500K Ω
- Output impedance: ~2K Ω
- Bypass: True-Bypass
- Current draw: <6mA
- Power requirement: 9V adapter or 9V battery

----- WARNING -----

Boost Tiger is REALLY powerful. Be careful with how much TIGER you set it for. I have personally seen this pedal take down an amp in the middle of a gig. Mr. Black is not responsible for any damage occurring as a result of using the Boost Tiger.
