

# eterna

*shimmering reverberator*

Wait a sec... that's your GUITAR!?

Thanks for supporting Mr. Black and picking up an Eterna. It's kinda amazing.

Every Mr. Black pedal is designed and handmade in the rainy pacific-northwest--Portland, OR to be specific.

Eterna creates a breathtaking multi-vocal reverb sound, almost as if 10,000 angels were singing exactly what you were playing. I can't believe it either.

## How to "get it on":

- Pick up your favorite guitar and get comfortable. This is an experience.
- Plug your guitar into the input jack on the right side of the pedal and your amp into the output jack on the left side of the pedal.
- Turn your guitar volume to zero and turn all the knobs on the pedal all the way up.
- Turn your amp on.
- Play your favorite chord and swell your volume control into the chord. Mr. Black votes B ♭ diminished minor.
- Party on, Wayne!

## Features:

- Lush reverb with up to a 40 second tail
- Shimmer makes your guitar sound like a choir of angels serenading in a supermassive auditorium in the clouds
- True-bypass
- 9V power (2.1mm negative center pin adapter) or internal 9V battery

To replace the 9V battery, grab your trusty philips head screwdriver and remove the four screws holding the backing plate on. The battery sits right below the foot-switch. I think you can handle the rest.

If you haven't already, join the Black List for news, specials, promos and even the occasional hot dog.

to sign up.

Its free. And free is a good color on me.

## Controls:

- MIX: Adjusts dry to wet signal ratio  
Full CCW: 1:0 ratio (all dry)  
Full CW: 0:1 ratio (all WET!)
- SHIMMER: Controls angels  
Full CCW: No angels  
Full CW: Vibrant angels
- DECAY: Sets length of reverb tail  
Full CCW: Short  
Full CW: Really, *really* long
- BYPASS SWITCH: Toggles on/off  
LED on: **ETERNA!!**  
LED off: Netenra. :(

## Tech stuff:

- Input impedance: ~500KΩ
- Output impedance: ~2KΩ
- Bypass: True-Bypass
- Current draw: <60mA
- Power requirement: 9V adapter or 9V battery
