

# FWONKBETA

## PURPLE FUNK GENERATOR

You smell that? Damn!! That **STANK!!** Player, that is the FwongBeta: Purple Funk Generator.

While it may seem like a simple envelope filter, the FwongBeta is actually a Purple Funk Generator. Why, might you ask is this called a Purple Funk Generator? Well, it's pretty simple. The FwongBeta Generates Purple Funk. And it STANK. The FwongBeta has sooooo much hind behind it, you may only be able to feel the funk, because your ears can't even hear the THROB swingin oh so low and heavy.

### Stroking the Funk:

- Get low and sweaty. Its only gonna get slipperier.
- Insert your instrument into the input jack (right side) and your amp into the output jack (left side).
- Start with all the knobs set straight up.
- Depress the footswitch, and graze over that string as if it's both of your VERY FIRST TIME. It happens fast. *Feel it.*
- Be careful with the FWONK. It'll move and shake with weight. Adjust to just what *feels good* to you.
- If you want a little more up top, turn that JUICE up. If you want that low-down-dirty-shameless 20/20 hindsight that only comes with years of watching that hind, keep it low.

### Features:

- The THICKEST, FUNKIEST, STANKIEST filter on planet earth
- FWONK control for extra sauce
- True-bypass
- 9VDC power (2.1mm negative center pin adapter) or internal 9V battery

Every Mr. Black pedal is designed and handmade in the rainy pacific-northwest; the "south-easy" side of Portland, Orr-Ray-gunn to be exact.

To replace the 9V battery, grab your trusty philips head screwdriver and remove the four screws holding the backing plate on. The battery sits right below the foot-switch. I think you can handle the rest.

If you haven't already, join the Black List for news, specials, promos and even the occasional hot dog.

Visit: [www.mrblackpedals.com](http://www.mrblackpedals.com) to sign up. It's free. And free is always a good color on me.

### Controls:

- STROKE: Input sensitivity (just the tip)
  - Full CCW: Numb.
  - Full CW: Sooooo touchy.
- FWONK: That STANK
  - Full CCW: Mellow and light.
  - Full CW: Musky and HUMID.
- JUICE: The top/peak/sauce
  - Full CCW: Sweaty, thick n low
  - Full CW: Jumpy and up
- BYPASS SWITCH: Toggles on/off
  - LED on: **UUUUNNNGGHHH!!**
  - LED off: square.

### Tech stuff:

- Input impedance: ~500K $\Omega$
- Output impedance: ~2K $\Omega$
- Bypass: True-Bypass
- Current draw: <60mA
- Power requirement: 9VDC adapter or 9V battery
