Super Swell

classic spring reverb

Is that a spring-tank dripping out of your amp or are you just happy to see me?

Thank you for supporting Mr. Black and cannon-balling into the deep end to make a big splash with the SuperSwell!!

The SuperSwell is designed to faithfully recreate the splashy reverb sound that only an outboard tube-driven spring tank can deliver. And Boy does it ***Deliver!***

Every Mr. Black pedal is designed and handmade in the rainy pacific-northwest, on the "south-easy" side of Portland, OR.

Making a splash:

- Find your favorite Hawaiian shirt. You're gonna need something that is both comfortable and easy to dry off.
- Plug your guitar into the input jack (right side of the pedal) and your amp into the output jack (left side of the pedal).
- Start with both the Mixer and Tone knob at high-noon, and crack the Dwell open.
- Depress the footswitch to get splashy.
- Make a bigger splash by increasing the Dwell knob, then tune the Mixer and Tone knobs to your favorite positions.

Features:

- All the splash and drip that made the vintage tube units so famous.
- Meticulously tuned Tone control which never gets sharp or shrill and delicately dampens high frequencies just right.
- True-bypass
- 9VDC power (2.1mm negative center pin adapter) or internal 9V battery

To replace the 9V battery, grab your trusty philips-head screwdriver and remove the four screws holding the backing plate on. The battery sits right below the foot-switch. I think you can handle the rest.

If you haven't already, join the Black List for news, specials, promos and even the occasional hot dog. Aren't they the best?

Its free. And free is a good color on me.

Controls:

- MIXER: Adjusts reverb level
  - Full CCW: No reverb (fully dry)
  - Full CW: All the reverb!!
- TONE: Adjusts reverb treble content
  - Full CCW: Dark reverb
  - Full CW: Bright reverb
- DWELL: Adjusts spring-tank drive
  - Full CCW: Gentle tank-drive
  - Full CW: Vigorous tank-drive
- BYPASS SWITCH: Toggles on/off
  - LED on: **TAKIN A BATH!!**
  - LED off: Bone dry.

Tech stuff:

- Input impedance: ~500KΩ
- Output impedance: ~2KΩ
- Bypass: True-Bypass
- Current draw: <60mA
- Power requirement: 9VDC adapter or 9V battery
